

Counos Payment Gateway; A Full Tutorial

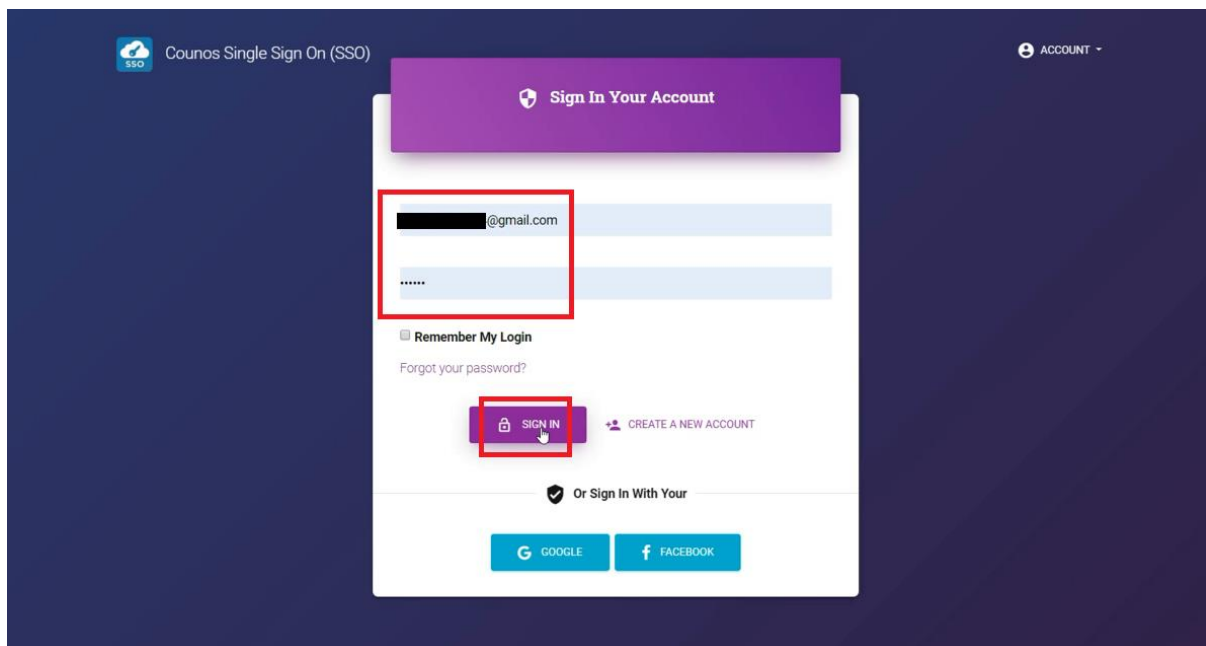

In this tutorial article, we are going to discuss Counos Payment Gateway and how to use this system step by step. Go to <https://payments.counos.io/>

Counos Payment Gateway works with Counos SSO. In order to login to your dashboard, you need to have an account in Counos.com (Counos SSO). To login to Counos Payment Gateway, click on Account and then Dashboard.

Then you will be redirected to Counos SSO and there you need to enter your email and password. Click on *Sign In* to enter Counos Payment Gateway.

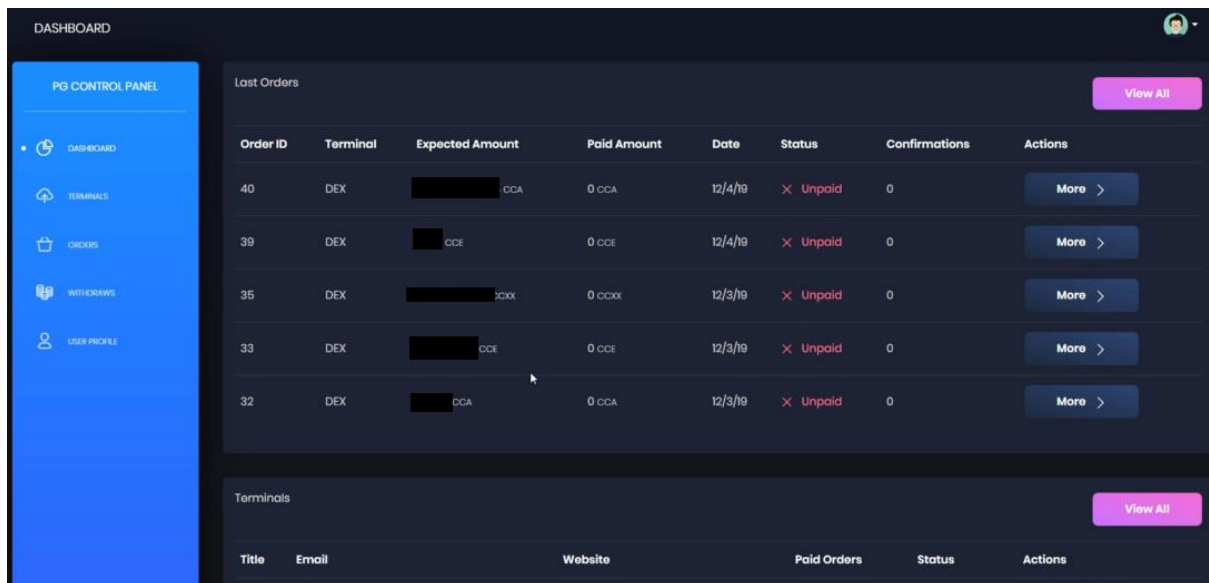

Before going any further it needs to be mentioned that in order to use Counos Payment Gateway, you need to have KVC verification (level 1). So if you don't have KYC verification, go to Counos SSO and get your KYC verification.

If you don't have KYC verification, you will see the following page when you enter Counos Payment Gateway:

As you can see if you don't have KYC verification you will not be able to use Counos Payment Gateway.

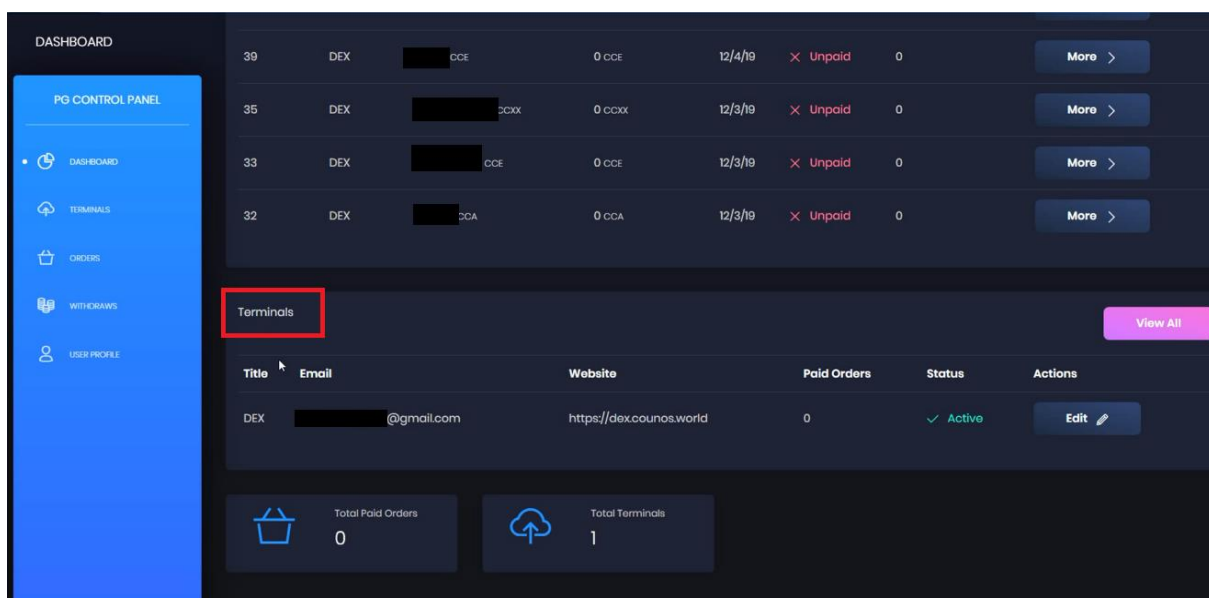

If you have KYC verification, after you login using Counos SSO, you will see the following dashboard in Counos Payment Gateway:

Order ID	Terminal	Expected Amount	Paid Amount	Date	Status	Confirmations	Actions
40	DEX	████████ CCA	0 CCA	12/4/19	× Unpaid	0	More >
39	DEX	██████ CCE	0 CCE	12/4/19	× Unpaid	0	More >
35	DEX	████████ CCXX	0 CCXX	12/3/19	× Unpaid	0	More >
33	DEX	██████ CCE	0 CCE	12/3/19	× Unpaid	0	More >
32	DEX	██████ CCA	0 CCA	12/3/19	× Unpaid	0	More >

As shown above, in the dashboard of Counos Payment Gateway, you can see all the latest orders, their status, dates, amounts, and other information.

If you scroll down, you can also see the terminals that you have added. You can see all the relevant information for all the terminals that you have.

Title	Email	Website	Paid Orders	Status	Actions
DEX	████████@gmail.com	https://dex.counos.world	0	✓ Active	Edit

Total Paid Orders

0

Total Terminals

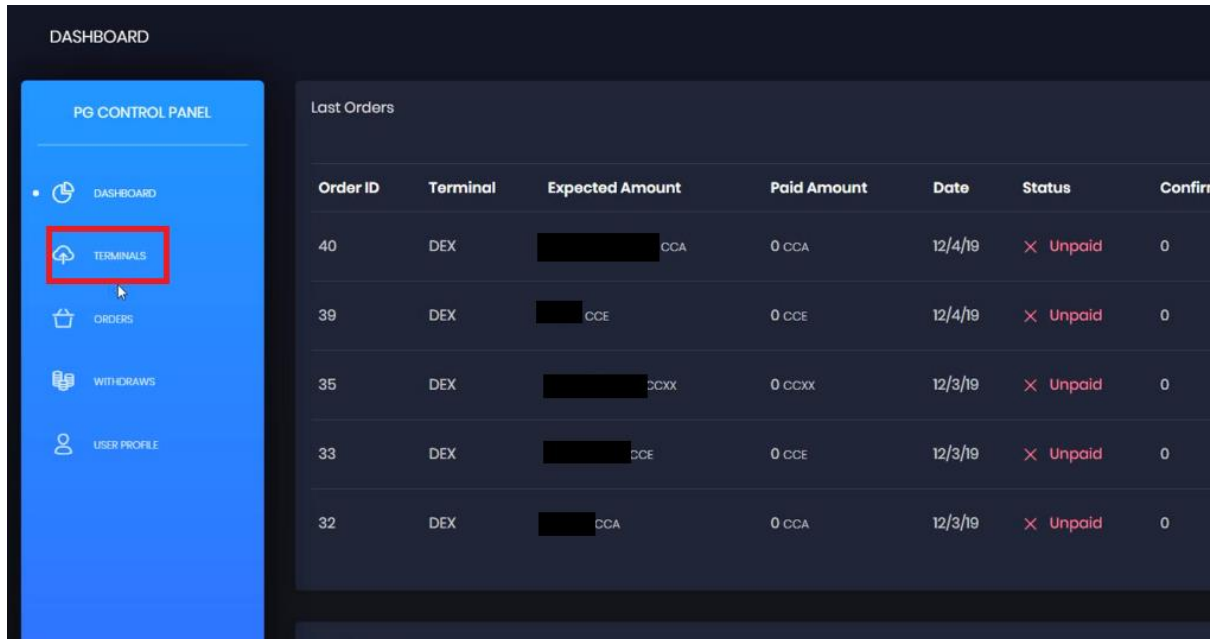

1

This was the information you can see on the first page of your Counos Payment Gateway dashboard.

Now let's go through the items in the left hand menu one by one.

As mentioned above, the first item was the Dashboard.

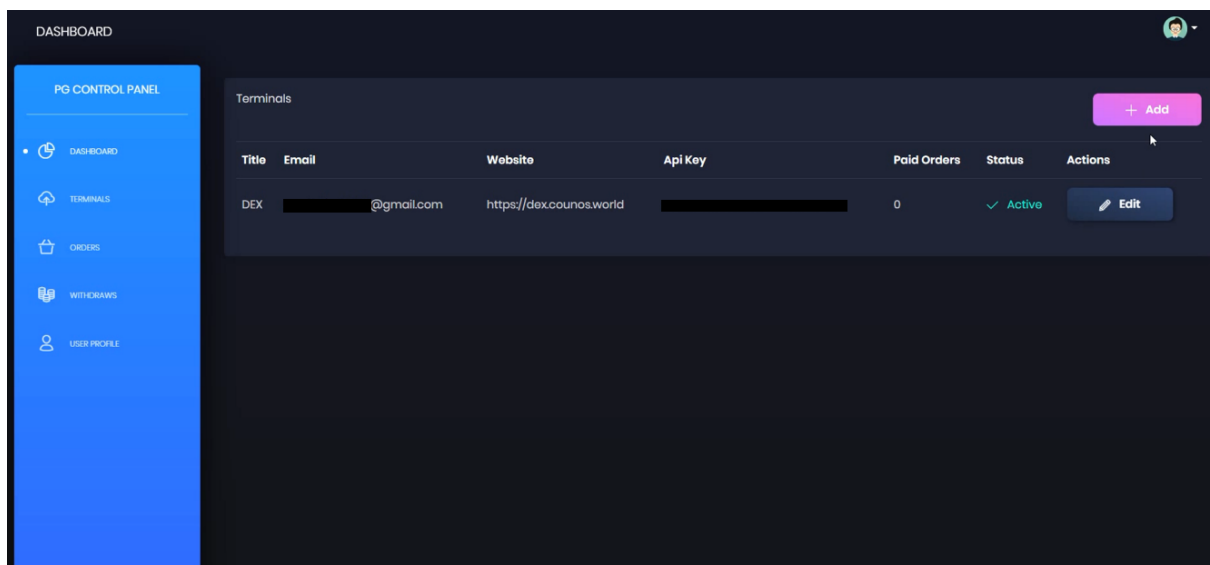

Click on the second item, Terminals.

The screenshot shows the 'DASHBOARD' page of the Counos Payment Gateway. On the left, the 'PG CONTROL PANEL' menu has 'TERMINALS' highlighted with a red box. The main content area displays a table titled 'Last Orders' with the following data:

Order ID	Terminal	Expected Amount	Paid Amount	Date	Status	Confirm
40	DEX	████████ CCA	0 CCA	12/4/19	× Unpaid	0
39	DEX	██████ CCE	0 CCE	12/4/19	× Unpaid	0
35	DEX	████████ CCXX	0 CCXX	12/3/19	× Unpaid	0
33	DEX	████████ CCE	0 CCE	12/3/19	× Unpaid	0
32	DEX	██████ CCA	0 CCA	12/3/19	× Unpaid	0

In this page, you can see the list of the terminals you have added.

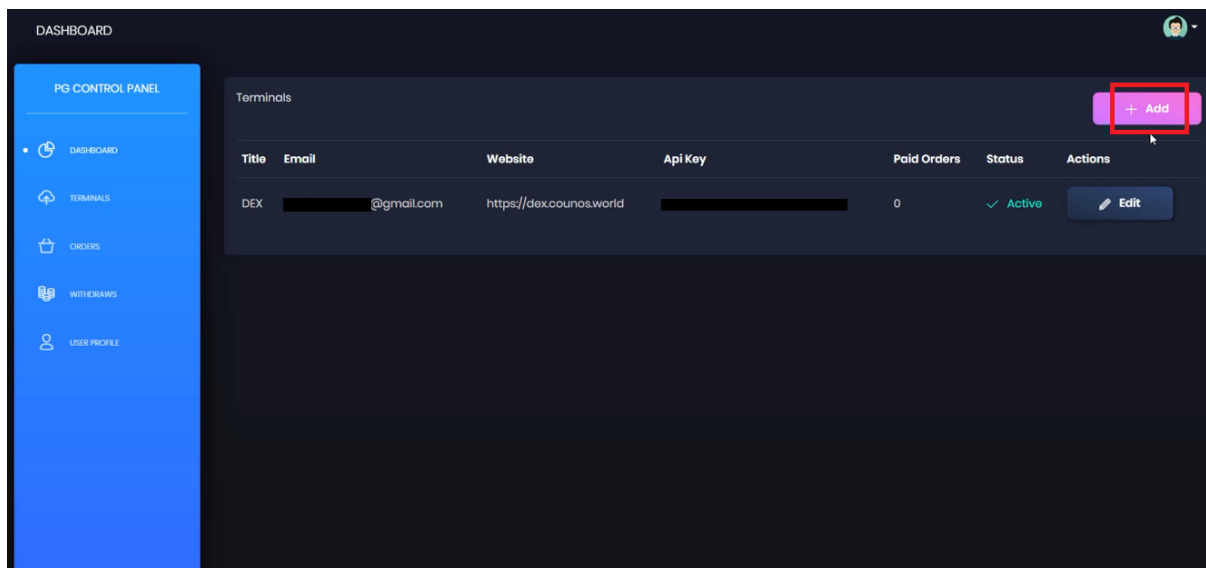

The screenshot shows the 'Terminals' page of the Counos Payment Gateway. The 'TERMINALS' menu item is highlighted. The table lists the following terminal:

Title	Email	Website	Api Key	Paid Orders	Status	Actions
DEX	████████@gmail.com	https://dex.counos.world	████████████████████	0	✓ Active	Edit

A '+ Add' button is visible in the top right corner of the table area.

In order to add a new terminal, click on *Add* on the top right side of the page as shown below:

After you click on that, you will see the following page:

A screenshot of the 'Create New Terminal' form in the dashboard. The form has several fields and checkboxes, each numbered with a red box and a number: 1. 'Title' field. 2. 'Website' field. 3. 'Email address' field. 4. 'Allow withdraw and send transaction from terminal's wallet.' checkbox. 5. 'Send Email Notifications' checkbox. 6. 'Active' checkbox. At the bottom right are 'Save Changes' and 'Back' buttons. The sidebar is the same as in the previous image.

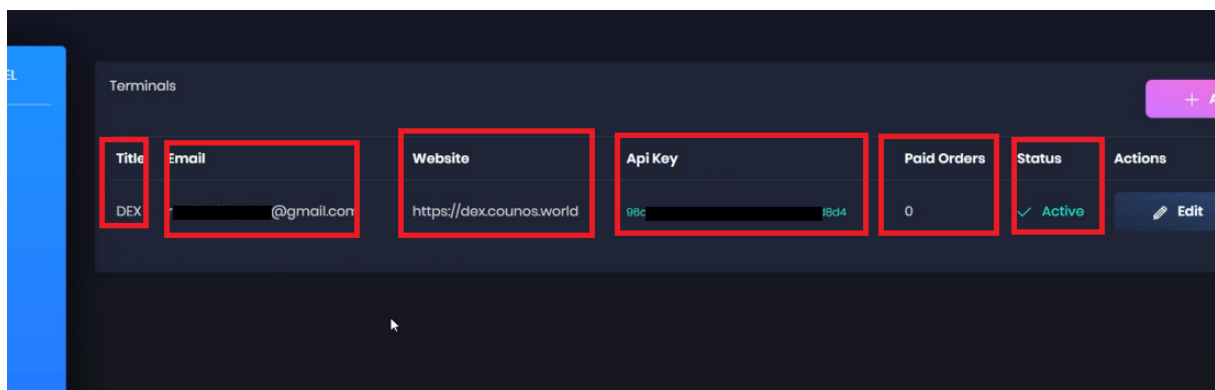

Let's go through the different parts of the *Terminals* page one by one:

1. This is where you should put the name of the shop
2. This is where you should put the website of the shop
3. This is where you put the email address of the shop (or any relevant email address)

4. If you choose this option, you allow withdrawals to take place via API (different APIs will be explained separately. You can withdraw via those, instead of going to the Withdraw menu in the Counos Payment Gateway)
5. This option is for receiving notifications via email
6. If you choose *Active* it means that this shop is active

At the end you can click on Save Changes to create a terminal.

You can see the terminal you created:

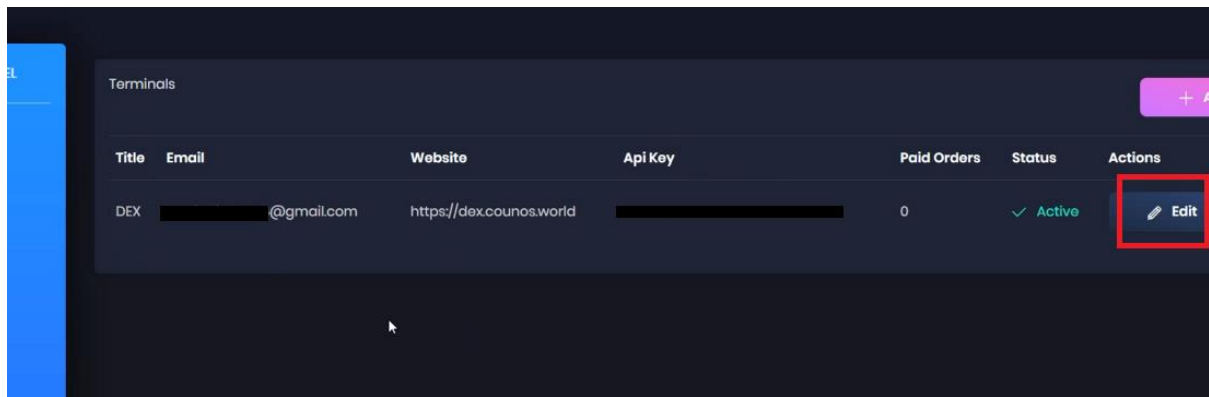

Title	Email	Website	Api Key	Paid Orders	Status	Actions
DEX	@gmail.com	https://dex.counos.world	98c...	0	✓ Active	Edit

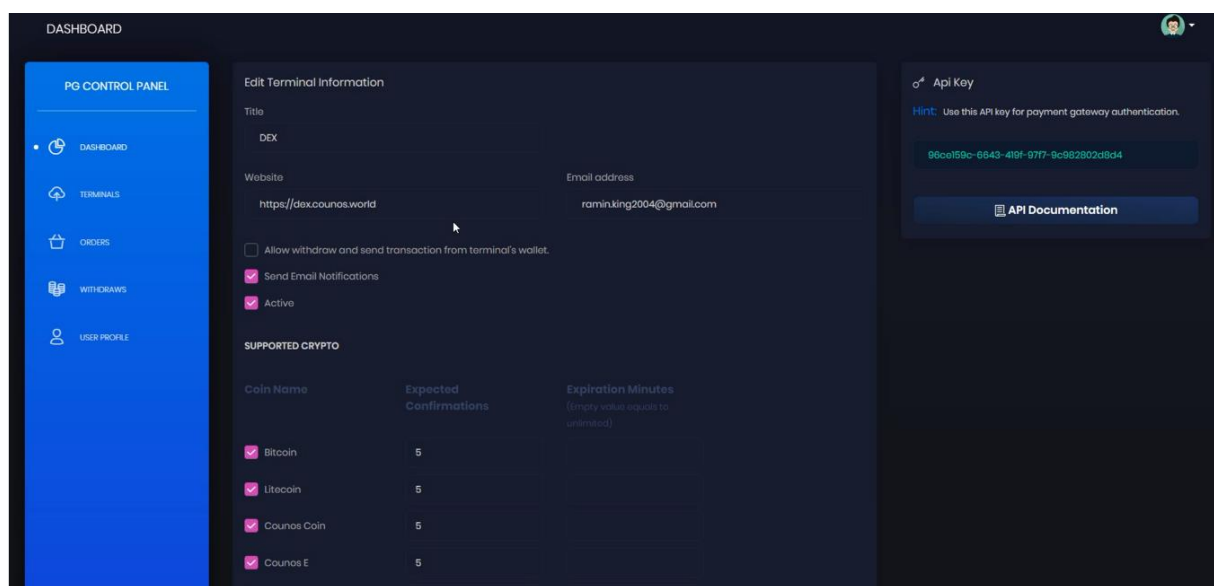

You can see the different information of the terminal you created:

- The title of the terminal
- The email address you put in
- The website of the shop
- An API key which is automatically created after you create a terminal. This API key will be used in the list of the APIs of the Counos Payment Gateway. You will need this API key created for you automatically for authentication.
- The number of paid orders
- And also the status of the terminal

If you want to edit the terminal you have created, click on Edit:

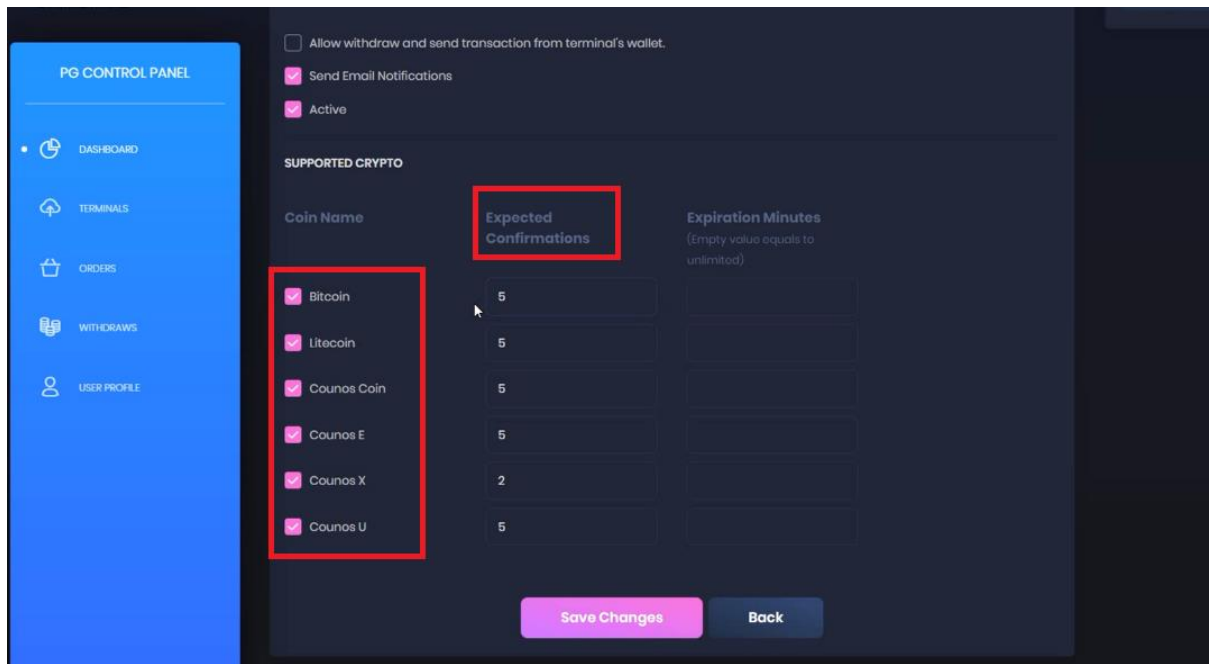

After you click on Edit, you will see the following page:

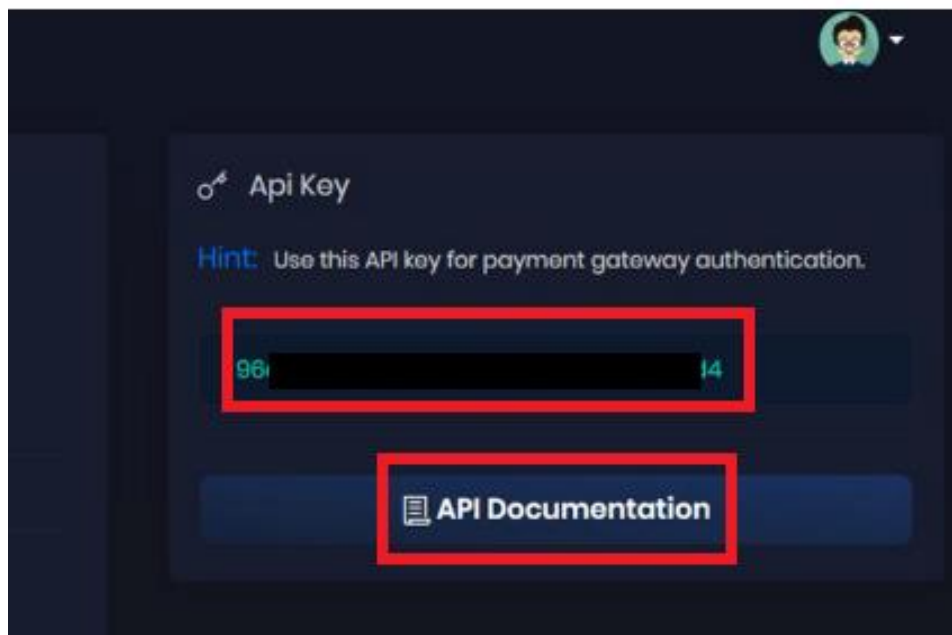

As you can see, in this page you can make changes to the terminal you have created.

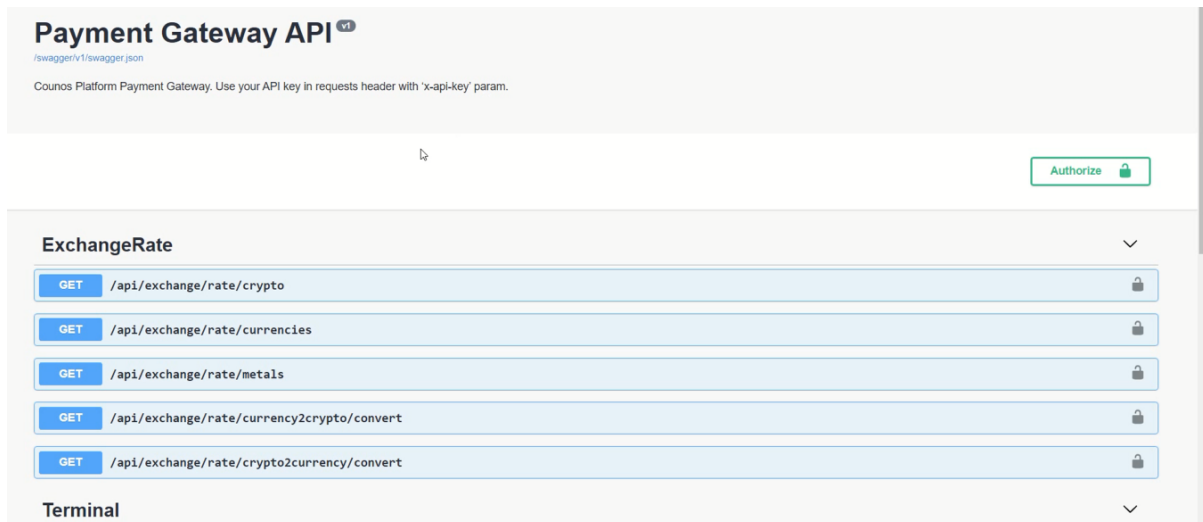

If you scroll down, you see that you can also pick or disable the cryptocurrencies and stablecoins you want and also determine the number of expected confirmations.

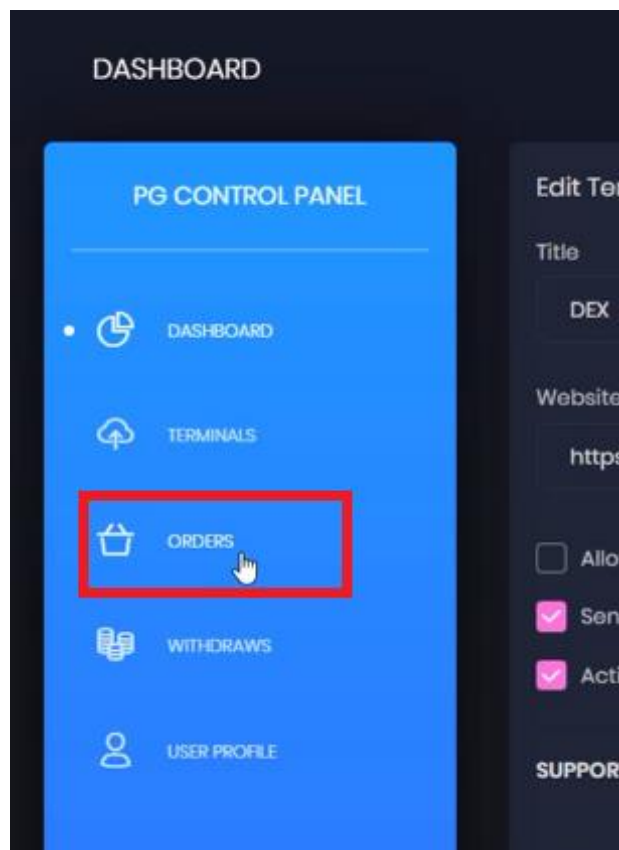

At the top right of the page, you can see the API that has been automatically created for this terminal.

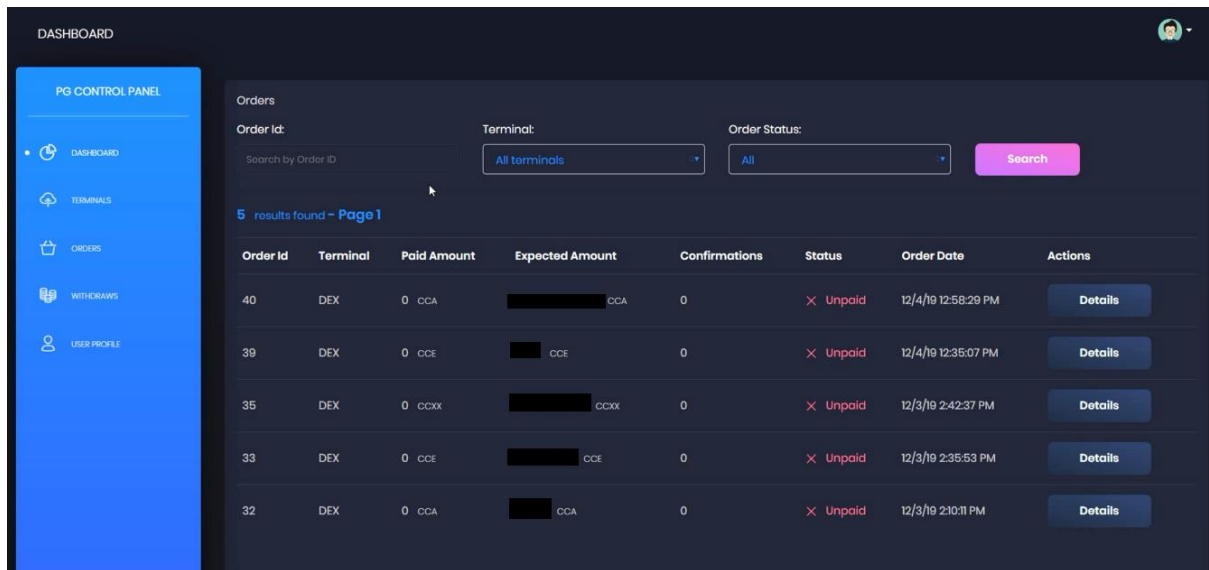

If you click on API Documentation, you can see the list of all the APIs that you can use along with how you can do it. (APIs and their functions are explained separately)

Let's move on to the next item on the left hand menu, Orders:

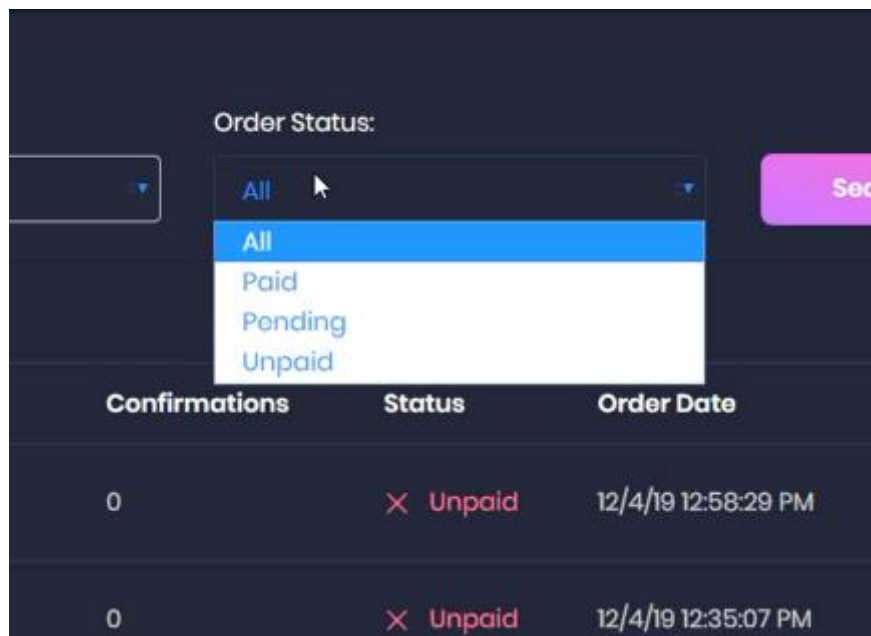

Inside the orders menu you can see all the requested orders and their information.

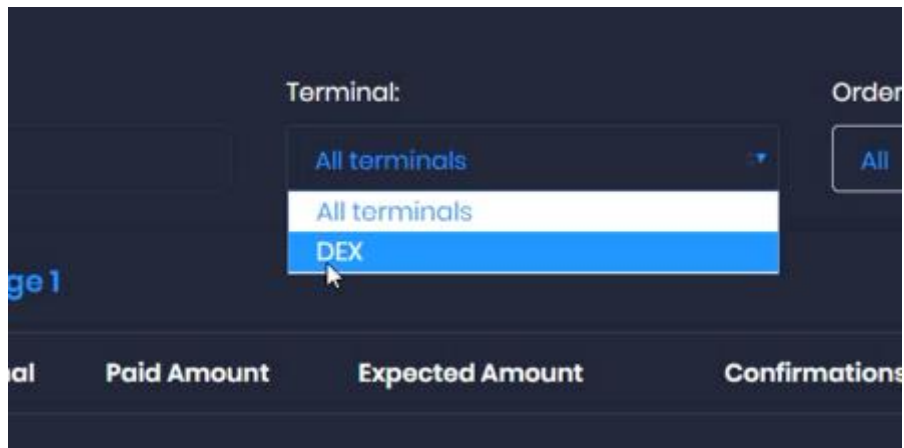

You can filter the orders based on four statuses, as follows:

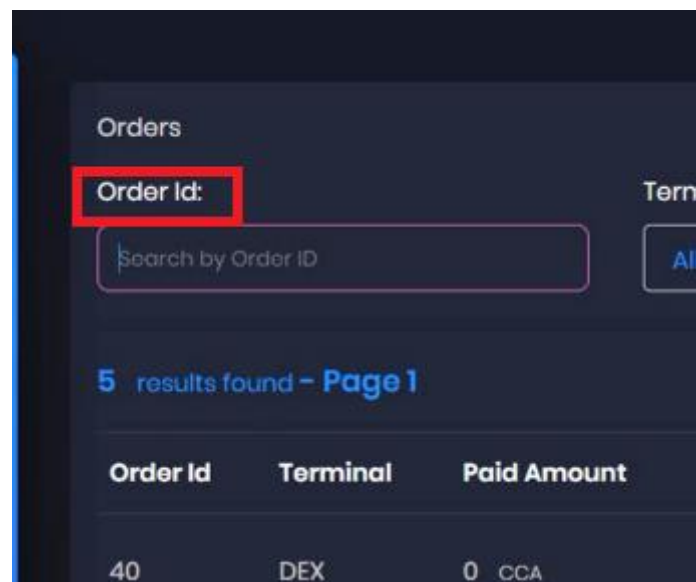

- All
- Paid
- Pending
- Unpaid

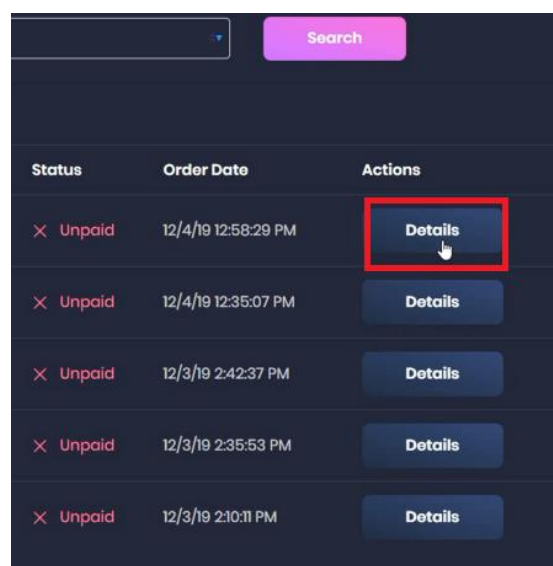

You can also choose between the order from different terminals:

Or, if you want you can search for a specific order by its ID:

If you click on Details for any order, you can see more information about them:

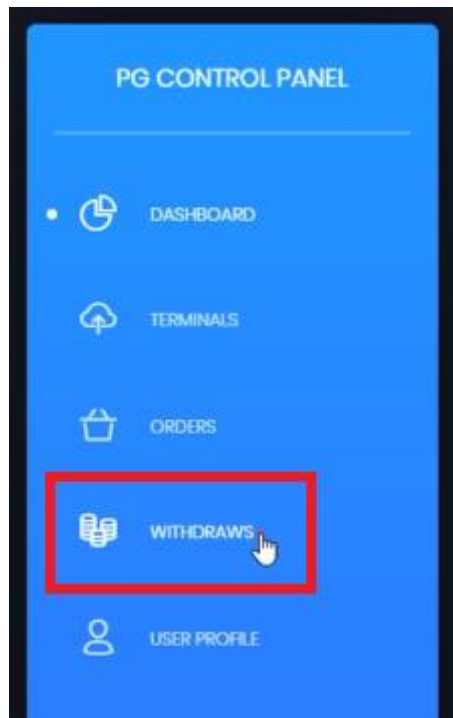

For example in the details of the order shown below, you can see:

- the order ID
- the name of the terminal in which this order has been requested
- the amount that has been paid
- the amount that should be paid
- the number of confirmations for the transaction
- the transaction ID for the payment
- the status of the order
- and the date when the order was requested

Order Details	
Order Id	35
Termial	DEX
Paid Amount	0
Expected Amount	63.65405448
Confirmations	0
Transaction ID	
Status	✕ Unpaid
Order Date	12/3/19 2:42:37 PM

The next item on the left hand menu is *Withdraws*:

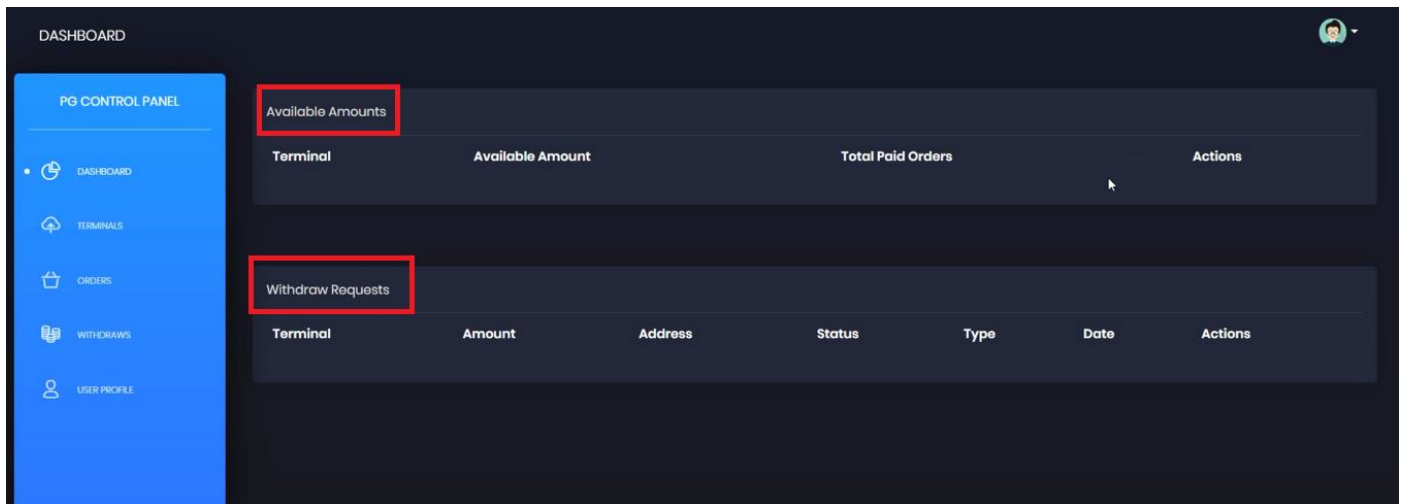

Inside this menu, you can see all the paid orders. All the paid orders are listed here. It tells you which terminal has what amount of money and how much you can withdraw. You can also see the total amount of money you can withdraw.

You can also see the withdrawal requests you have made. Here you can manage these requests.

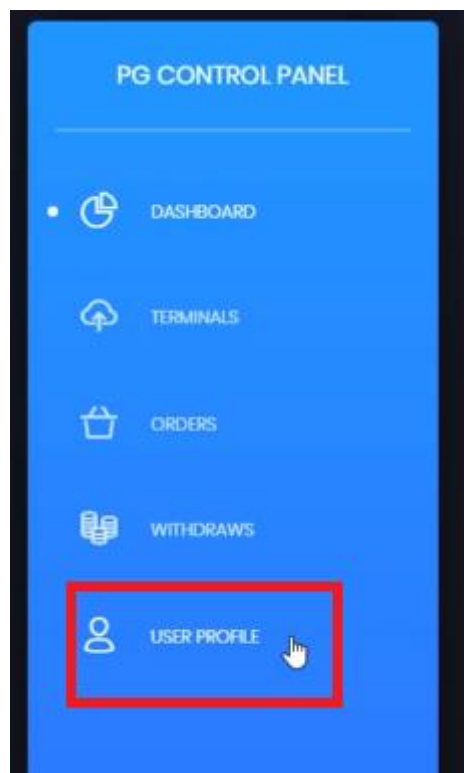

These requests are done with two-factor authentication. First you make the withdrawal request. Then an email will be sent to you containing the verification link. You need to click on that link, and after that you will be redirected to Counos Payment Gateway and then you enter the wallet address and that amount will be sent to you.

The payment gateway fee is 3 percent, which will be shown to you when you are making the withdrawal, and it will be deducted from the amount of your withdrawal.

Of course, withdrawals have some limitations. Coins have a minimum limit, and in order for you to be able to withdraw them, the amount that you want to withdraw must be more than that minimum amount.

The last item on the left hand menu is about your account information:

These information are taken from Counos SSO. You can see the information as shown below. You can also see the last time you were active:
